

I Can't Fix Us Two

Katie Costello

Let the phone at half past three
Now its quater till and you're to be seen
Last I saw you're face was ten hours gone
And suddenly you're sorry
Its my fault for giving in

You wil never love the way you know
You will never love the way you show

Yet I go back to you
Every chance I get
No matter how soft my skin is
The last time you dug real deep

My bones are shaking I can't do this any more
I need to stop missing you
I can't fix us two

Left you by my heart now its raw and red
I should've said how mad I really was

Told you how I felt but now its done
I go to sleep upset
I didn't tell yopu what I meant

You will never love the way you know
You will never love the way you show

Yet I go back to you
Every chance I get
No matter how soft my skin is
The last time you dug real deep

My bones are shaking I can't do this any more
I need to stop missing you
I can't fix us two

Will we part our ways
It's hard to say
We've come to far to say

We just can't stay

It seems we'll always be two
No I'll never quite get you

Yet I go back to you every chance I get
No matter how soft my skin is
The last time you dug real deep

My bones are shaking
I can't do this any more
I need to stop missing you
I can't fix us two

You will never love the way you know
You will never love the way you show

Left you by my heart now its raw and red
I should've said how mad I really was
