

# Run Away With You

Michael Ray

Sometimes it feels just like you're so far away  
Don't take the time to say the things we use to say  
I can't remember the last time together  
lost in each others eyes  
It just ain't right  
Come on baby let's leave tonight I just wanna run, I just wanna run away with you  
And live wide open  
Set 'em on fire crazy like we use to do  
Don't matter where we're going  
Up on a mountain, down by the beach side  
Til we find the love that we fell into  
I just wanna run, I just wanna run away with you  
I just wanna run away with you I miss your midnight kiss  
Loving you all night long  
But this life's like a rip tide  
And we're barely hanging on  
Caught up in the worry and always in a hurry  
And losing what we're all about  
Slow it down  
Take our love and get outta this town I just wanna run, I just wanna run away with you  
And live wide open  
Set 'em on fire crazy like we use to do  
Don't matter where we're going  
Up on a mountain, down by the beach side  
Til we find the love that we fell into  
I just wanna run, I just wanna run away with you  
I just wanna run away with you Wanna lay you down  
Hear nothing but the sound  
Of my name on your lips  
We can let it all go  
Pull real close  
Find that place again I just wanna run, I just wanna run away with you  
And live wide open  
Set 'em on fire crazy like we use to do  
Don't matter where we're going  
Up on a mountain, down by the beach side  
Til we find the love that we fell into  
I just wanna run, I just wanna run away with you  
I just wanna run away with you I just wanna run away with you

I just wanna run away with you
