

# Stars

## David Duchovny

I've been told  
That some stars in the sky  
Shine a light  
From stars that have died long ago  
Still keep on shining in your eyes  
I see the light  
Of a love that died long ago

When the fire is dead  
How can it be that the sparks still fly?  
The ghost you left in my bed  
Stars you showed on my empty sky  
Still shine, in my head

I've been told  
That stars in the sky  
If it's true  
That they're no longer alive anymore  
If they still keep on shining their light  
So that I might find my way home tonight

So I will ask  
Of the light in your eyes  
The ghost of a love that died long ago  
Can they still keep on shining, shining your light  
So that I might find my way home  
One more night tonight

---
