

Even If It Breaks My Heart

Mountain Heart

Restless shadows gather in your eyes
Watching the horizon day and night
Now there you see, so many things
But all you do want is to chase your dreams

If it takes goodbye to help you reach that far off star
Somehow I'll find a way to say the words
If letting go helps you discover just how beautiful you are
And brings you all the good that you deserve
I'm glad I played a part, even if it breaks my heart

Silence like the sunlight fills this room
Strange how I'm already missing you
But one more kiss won't be enough
To make you feel this kind of love

If it takes goodbye to help you reach that far off star
Somehow I'll find a way to say the words
If letting go helps you discover just how beautiful you are
And brings you all the good that you deserve
I'm glad I played a part, even if it breaks my heart

I'd do anything for you
Anything you need me to
Just to make you happy
I'd do anything for you

If it takes goodbye to help you reach that far off star
Somehow I'll find a way to say the words
If letting go helps you discover just how beautiful you are
And brings you all the good that you deserve
I'm glad I played a part, even if it breaks my heart

Oh, even if it breaks my heart
