

# Warmest Rising Sun

[Lou Gramm](#)

The way she moves alone, so late at night  
The woman knows, she's a mystery  
And she's mine tonight  
That's all I want to know What would I do without her?  
Who would I be alone?  
You see I love everything about her  
And I'd never ever let her go The wind blows cold tonight  
I'm counting stars one by one  
Holding her so close tonight  
And I know she is my warmest rising sun Now I'm searching out her secret dreams  
I wonder if she knows what her love means What would I do without her?  
Who would I be alone?  
You see I love everything about her  
And I'd never ever let her go The wind blows cold tonight  
I'm counting stars one by one  
Holding her so close tonight  
And I know she is my warmest rising sun
