Mix It Up

311

You take a little bit of me and a whole lot of you
Add it up together and here's what you gonna do
You gotta mix it up quick and it'll blow up on the spot
I gotta tell ya that the place gettin' hot nowMix it up, uh just mix it up what the
Sum of all the parts when you add it up make much
More than what you had I tell you what it's like mad
The baddest thing that you ever had, uhI was never too good at math anyway
But when you add it up it comes out more I have to say
A lot of people looking for what you and me have found
And now it seems no one's around, uhA little bit a me and a whole lot of you
Add it up together and here's what you gonna do
You gotta mix it up quick and it'll blow up on the spot
I gotta tell you that the place gettin' hot nowMix it up, uh just mix it up what the
Sum of all the parts when you add it up make much
More than what you had I tell you what it's like mad
The baddest thing that you ever hadWe're just two misfits that no one else gets
Everyone else in the place became a silhouette
Soon as there was you it all comes in view on my guitar
I see the sparks when we have those conversations in the darkI was never too good at math anyway
But when you add it up it comes out more I have to say
A lot of people looking for what you and me have found
And now it seems no one's aroundA little bit a me and a whole lot of you
Add it up together and here's what you gonna do
You gotta mix it up quick and it'll blow up on the spot
I gotta tell you that the place gettin' hot nowMix it up, uh just mix it up what the
Sum of all the parts when you add it up make much
More than what you had I tell you what it's like mad
The baddest thing that you ever hadWe're just two misfits that no one else gets
Everyone else in the place became a silhouette
Soon as there was you it all comes in view on my guitar
I see the sparks when we have those conversations in the dark
