

Fourth Dimension (Acoustic)

Lights

I could take steps in this moon and that cloud
Look at my breath and still feel the warm out
This isn't about seasons or about rhyme and reason
Trying to be smart but my 0's and my ones
Only show starts in my toes and thumbs
Nothing adds up but agrees
You becomes us and makes threeHere's to such an old invention
Dear, we touched the fourth dimensionBottle rockets and time bombs and warheads
We could go back, or keep on, or be led
Follow me to the chapel, we're the kings of the castle
It's a science, but there's room to believe
In the riots, I find you and I breathe
This isn't for the weak hearts
But everyone's here at some partHere's to such an old invention
Dear, we touched the fourth dimension
Tears to such an old invention
Here's an honorable mentionI'm on moons and clouds
Where worlds wrap around
I'm on moons and clouds
Where worlds wrap aroundHere's to such an old invention
Dear, we touched the fourth dimension
Tears to such an old invention
Here's an honorable mention
We touched the fourth dimension
We touched the fourth dimension
We touched the fourth dimension
