

# Into the Light

## Estrich Boy

Can anybody tell me why  
We're lying here on the floor  
And neither of us can barely breathe at all  
The doctor's saying hold on tight  
As we say our last goodbye  
And this is a moment that changes our whole lives  
And I still believe in the good  
And I still believe in the light  
And I wanna feel the sun  
I wanna free you tonight  
And I still believe in the good  
And I still believe in the light  
And I wanna feel the sun  
I wanna free you tonight  
I'm staring deep into your eyes  
They're telling me the time has come  
And I know you're ready to rise and sail home  
The room is filling up with light  
As we say our last goodnight  
I thank you for every second of your life

And I still believe in the good  
And I still believe in the light  
And I wanna feel the sun  
I wanna free you tonight  
And I still believe in the good  
And I still believe in the light  
And I wanna feel the sun  
I wanna free you  
And I'm falling, watching as you're hurting  
I'm down here I'm on my knees  
How can I survive  
Then you turn to me and promise me you're ready  
And tell me you'll be waiting on the other side  
And I still believe in the good  
And I still believe in the light  
And I wanna feel the sun  
I wanna free you tonight  
And you showed me all the good

And you lead me through the light  
And you gave me the sun  
It's time to free you tonight
