

Maggot Colony

Carcass

Oozing chyme reeks as your duodenum is hacked
Secreting gastric juices, enzymes melt your fecal tract
Torn major arteries, your corpse with blood is drenched
Your mouth is ripped inside out as your esophagus is wrenched
Maggots and grubs bore into the moldy remains
Masticating lymph, caked blood and cankered decay
Maturing brains play host to the grisly feet
Stuffed anal passage, served on a plate
Purulent torso is a perfect maggots meal
Split cerebrospinal fluid is sucked up with zeal
Botulism vitiates the emulsifying bile
Liquidized gall bladder, viscid pus smells vile
