Raze

The Azonic

Let's start a fire, biggest one you've ever seen
You bring the matches, I'll bring the gasoline
Ignite it, delight it, the flames grow higher
Burn the world upon a funeral pyreRaze, light this motherfucker like a Roman candle
Burn this bitch straight to the ground
Raze, let's not worry about consequences
If it's standing, we'll bring it downDestroy it all, show no inhibition
Revel and rejoice in unbridled demolition
Smash it, fuck it, nothing will remain
Detect it and wreck it but never take the blameRaze, light this motherfucker like a Roman candle
Burn this bitch straight to the ground
Raze, let's not worry about consequences
If it's standing, we'll bring it downWe have ignitionShake the earth from its very foundation
Lay waste to the world without hesitation
Break it, take it, you don't have any reason
Fuck it, destruct it, its demolition season
