Faceless

the nomad

This is the end of humanity
People have lost their sanity
Want to destroy their mentality

And to create an artificial reality
This is new plage
May think it's fate

All nations, all races, become faceless!
All nations, all races, become faceless!
All nations, all races, become faceless!

Very well thought-out scheme
Works like a clock
Everyone makes a contribution
Each of the flock
Absence of the entire human
Is payment for peace
In the name of this
Refused from passions with ease

Now you're a part of mechanism
All senses died within
You just swim with the stream
Your technologies on its peak
But the body becomes weak
You have no face, You can not speak

System controls your life
And each of your cells
What will you do
if one day this progam will fail?
You just parasites
That are not adapted to life
Without a face
Without a soul
and without a mind

Now you're a part of mechanism
All senses died within

You just swim with the stream
Your technologies on its peak
But the body becomes weak
You have no face, You can not speak

Faceless, Soulless
With empty head
They are produced
Brainless, Eyeless
Faceless world plunged
Into silence

Now you're a part of mechanism
All senses died within
You just swim with the stream
Your technologies on its peak
But the body becomes weak
You have no face, You can not speak

Faceless, Soulless
With empty head
They are produced
Brainless, Eyeless
Faceless world plunged
Into silence
Faceless, Soulless
With empty head
They are produced
Brainless, Eyeless
Faceless world plunged
Into silence
