

# Brave (feat. Saywecanfly)

## Sunroof

Life is a rainstorm so stay on the road  
The city lights will always lead you home  
And you don't have to be alone  
Don't listen to the words they say  
Cause everything is gonna be okay  
You're never on your own I'm gonna miss you  
But letting go is gonna make you brave Don't forget to breathe  
There's a life ahead just waiting for you to believe  
It's been forever since you've seen beyond the trees  
And don't forget to dream  
Cause there's a fire in your heart that I've never seen  
And everything that makes you smile  
Is gonna make you brave Life is a deep breath so take it all in  
And clear your head before you even begin  
To say you'll never make it through  
And think of all the wondrous things  
The places that you've dreamed of all your life  
And now you're taking flight I'm gonna miss you  
But letting go is gonna make you brave Don't forget to breathe  
There's a life ahead just waiting for you to believe  
It's been forever since you've seen beyond the trees  
And don't forget to dream  
Cause there's a fire in your heart that I've never seen  
And everything that makes you smile  
Is gonna make you brave And when the sun comes up  
You'll meet it with a smile  
But if the sky goes dark  
You know it's only for a while  
And I want you to know  
You're only as brave as the light inside you glows So don't forget to breathe  
There's a life ahead just waiting for you to believe  
It's been forever since you've seen beyond the trees  
And don't forget to dream  
Cause there's a fire in your heart that I've never seen  
And everything that makes you smile  
Is gonna make you brave
