Learn To Last

A Telemetry

justice
tell me what that means
concern
pushing my thoughts to extremes

someone told me before
everything happens for reasons
slam the door on
mistrust - ill-will - blind-faith and

learn to last - and make it through the trial
let's learn to last - all of the while

impoverished
with a restless wait
restrained
cornered by a helpless state

someone told me before
everything happens for reasons
set yourself free from
wrong path - lost hope - dark tides and

give it shot - your desire
solitude the cost - fuel the fire - to live
