## The Key

## **Black Stone Cherry**

Out here there's a hole in the sky Doors open to the other side

I saw a two headed dog fighting over a bone

Black haired woman turned into crowsI gotta take a step back and think this through

I gotta know it's trueI gotta know that I'm living in a dream Is this what it seems? Gotta know anyone believes

How did I get lost? What's the final cost?

Could you please help me find the key?Out here under the willow tree

Down deep is where you'll find the key

I've been here once before

Maybe in a dream thylacines play tambourineI gotta take a step back and think this through I gotta know it's trueI gotta know that I'm living in a dream

Is this what it seems? Gotta know anyone believes

How did I get lost? What's the final cost?

Could you please help me find the key?Out here the saying goes off with the lights

And on with the show

Once it's dark the children play

They all join hands and dance around the graveI gotta know that I'm living in a dream

Is this what it seems? Gotta know anyone believes

How did I get lost? What's the final cost?

Could you please help me find the key, find the key?
