

# Out Of Control

## She Wants Revenge

With her high heel against the wall  
Kind of dancing, though not at all  
She had stockings running up to her thigh  
Snaps her finger to keep the time.  
From the back of the room I saw her there  
I said she wants to be alone and I shouldn't dare  
But then she noticed me glance at her  
I had no choice but to dance with her. The lights they move sideways and up and down  
The beat takes you over and spins you 'round  
Our hearts steady beating, our sweat turns to cold  
We're slaves to the DJ and out of control I watched her feet move  
Her hips they sway  
Does a hair flip  
And starts to say  
'oh my god it's my favourite song'  
I pull her close and she sings along  
We can't slow down even if we try  
If the record keeps spinning then so will I  
She likes disco and tastes like a tear  
Tells me don't stop dancing and she's pulling me near The lights they move sideways and up and down  
The beat takes you over and spins you round  
Our hearts steady beating, our sweat turns to cold  
We're slaves to the DJ and out of control we've got no where to go  
We've got nothing to prove  
Instead dancing alone I should be dancing with you  
This song turning me on  
The beat is doing me in  
Or maybe its only you  
But either way let's begin we've got no where to go  
We've got nothing to prove  
Instead dancing alone I should be dancing with you  
This song turning me on  
The beat is doing me in  
Or maybe its only you  
But either way let's begin we've got no where to go  
We've got nothing to prove  
Instead dancing alone I should be dancing with you  
This song turning me on  
The beat is doing me in

Or maybe its only you  
But either way let's beginThe lights they move sideways and up and down  
The beat takes you over and spins you round  
Our hearts steady beating, our sweat turns to cold  
We're slaves to the DJ and out of controlThe lights they move sideways and up and down  
The beat takes you over and spins you round  
Our hearts steady beating, our sweat turns to cold  
We're slaves to the DJ and out of control
