

Repulsive

Reef

Feeling horny, and just that
You dont want my love, Ill take it back
Learned a lesson, on my knees
I dont want your dreaded sympathy All I want, all I need
Is some mercy for me please
Give it up now Visions of me that make your face a frown
You want to change my crocked world around
What I got, what is in my past
Youre not able to see in just one glance Come down, come on, come on, come on
She dont want nobody round
She dont want nobody coming home
