Robotic

Bis

Hey, you dark hair, I looked liked what I saw
You stood so close, I don't know who you are
I'm sure you smiled, I think I saw you look
Will you be there for me to see next week?I saw you last week
I liked what I saw
You looked at me strangely
How about a dance?Hey, you red shirt, where should we go from here?
The time has come, it's not too late for me
Can I call you? I'll be there if you want
You left looked back, I know you want me tooJust last week, beside me as I danced
Now it's up to you, willing to take a chance
Just last week, beside me as I danced
Now it's up to you, willing to take a chanceJust last week, beside me as I dance
Now it's up to you, willing to take a chance
Just last week, beside me as I dance
Now it's up to you, willing to take a chanceI saw you last week
Don't know who you are
You stood by the bar
I caught you looking at me
