World Waits For You

Son Volt

When the world wants right and wrong
Could you break me the news
If i asked you to lie
Would you tell me the truthIn this darkest hour
A brave face will break soon
The world waits for you
The world waits for you
Could you carry me throughIt's hard to wake up
Fateful hands that we find
Promises bogged down
Just chasms to climbIn this darkest hour
A brave face will break soon
The world waits for you
The world waits for you
Could you carry me through
Find strength from the words
Of those that went before
Take what you need
But leave even more
