

# Cold Comfort (Frozen)

## Haujobb

extreme real dream  
perpetually hammering  
moving pictures around  
some smell of industry  
don't know what's happening  
something fills me up with greed  
i feel cloned  
yes i am homeorder forms originals  
same shit a million times  
equal products compete  
with each other for to breathe  
never leave  
a stable existence  
fixed fragments  
of a single entanglementmaintain a constant pulse beat  
close to the environment  
planet me  
rotation  
so necessary neverending clarity  
excluding any possibility  
trust me  
we define everything
