

Close Your Eyes

Young Love

Close your eyes
Don't want you to see where I'm taking you tonight
Let's just say it's a surprise seeing you again
What a surprise to be with you again I'm a man on the scene
See you around the same way I always do
See you around the same way I always do
See you around, you know I'm hoping to Where are we going, have we gone too far
Losing our clothing, have we gone too far
Have we gone too far, have we gone too far
Have we gone too far What a surprise seeing you again
What a surprise to be with you again
See you around the same way I always do
See you around, you know I'm hoping to What a surprise seeing you again
What a surprise to be with you again
See you around the same way I always do
See you around, you know I'm hoping to (What a surprise, what a surprise)
Where are we going?
Just close your eyes till we get there
(What a surprise, what a surprise)
You won't know where I hope I see you around the way I always do you
It's always a surprise to be with you
I hope I see you around the way I always do you
It's always a surprise to be with you
