

Hard and Strong

[Alice Russell](#)

(Verse)

Left the car at the petrol station
Standing there for all to see
There's the boat to see up
Starring back to me I took a handful of all the people
Got to hear their minds and heard the screams
Always wrong
Sick of stuff and spill the dreams She is all around you, in you and me
Games of our own creation
Fall to our hands and feet Stop the fight it's useless
You can always stand and ask for more
Always wrong
So tell me what you're fighting for (Chorus) x4
You can't stop the lights from turning on
Though these words brought back
They come back hard and strong (Verse)
So don't open up your window
Be sure to lock your door
As she is coming for us
As we're sleeping on the floor Tell your heart to reach for something more
All is wrong. Watch people spill their dreams
Yes it's all around us, it's in you and me
The games that we created, fall at our hands and feet Stop the fight it's over
We will watch others fall
It's freedom yet for granted
And what I saw we're fighting for You can't stop the lights from turning on
Though these words brought back
It's the chemical make up biology (Chorus) x2
You can't stop the lights from turning on
Though these words brought back
They come back hard and strong Stop the lights from turning on (x4)
