

Pretty

[Sean McCarthy](#)

You get so pretty every time I see you
How do you do that?
What it must be like to be you
I'd like to be right where you're at
Could you do me a favor, please?
Just keep that smile for me
And I'll save all of mine for you
I would give you everything in this heartbeat
And I want you to know everything about me
And I barely know you, but years on down the road
It'll be just like we used to do
And daylight fades so fast
When you only wish it would last
Time's always in a hurry let's not waste
One more blink of your eyes
I would give you everything in this heartbeat
And I want you to know everything about me
And I barely know you, but years on down the road
It'll be just like we used to do
Sun comes up, sun goes down
I go through my head and you're always around
Just like that movie, just like that song that plays
I go through my mind and you're always
I would give you everything in this heartbeat
And I want you to know everything about me
And I would give you everything in this heartbeat
And I barely know you, but years on down the road
It'll be just like we used to do
Just like we used to
