

The Crown (Cool Million remix)

[Lisa Stansfield](#)

He will always be my man to me
That is why I never let it be
You see I know the man like the back of my hand girl
It's just not worth it
Baby you are not defence and you won't be the last
If you wanna skip around
I tell you what
You never finish what you start it
You stepping on my ground
You'll only leave you with a broken heart
You never let him down
He uses you up like I always said he would
This is the battle ground
If you want a way of the crown
It's not just about me say even in face
It's all about your dignity and your grace
I know you don't wanna listen and you don't believe
But I can see what's coming
Ooh you never understand so you better get out while you can
If you wanna skip around
I tell you what
You never finish what you start it
You stepping on my ground
You'll only leave you with a broken heart
You never let him down
He uses you up like I always said he would
This is the battle ground
If you want a way of the crown
You never leave with that
If you want a way of the crown
Don't blow your young heart to the loins
You'll only end of crying
Then you only have yourself to blame
Don't keep pretending you're a woman, little girl
This just ain't your world
And you never take my place
No, if you wanna skip around
I tell you what
You never finish what you start it

You stepping on my ground
Youll only leave you with a broking heart
You never let him down
He use you up like I always said he would
Its a lesson you should learn
Dont wana get your fingers burned
If you wanna skipp around
I tell you what
You stepping on my ground
Youll only leave you with a broking heart
You never leave him down
He use you up like I always said he would
This is the balttle ground
Go home little girl
