

Sleep Well Tonight

Fightstar

Sleep well, tonight
I'll wake you at the first sign of light
If you just make sure
You sleep tonight Take care, stay with us
All you've seen has gone
If you dream the truth
It will all come clear Pull me up just to make a stand If you could take a lifetime away
And make me come back down
If you could take the hours then
Maybe we could fall apart
I could stay the same Sleep well, tonight
I'll wake you at the first sign of light
If you just make sure
You sleep tonight We fell like everyone else has our mark
Will show where we were for our last time
We'll carve the marks to remember this If we could take a lifetime away
And make us come back down
If you could take the hours then
Maybe we could fall apart
I could stay here Sleep well, tonight
Sleep well, tonight
Sleep well, tonight If we could take away the summit
We could climb the highest we've ever been to
If we could take away the summit
If we could take away the summit
If we could take away the summit
