Until We Collide

Sound the Alarm

Hear me completely
Enough's enough today
At last, I recognize
You're only in my way and II can't take anymore
You're holding onto hope, it's the same as before
So, don't you waste anymore of our time
We'll hover close to safety until we collideBreak me completely
Keep me to yourself
That way I understand
That time takes time itself and I rewindI can't take anymore
You're holding onto hope, it's the same as before
So, don't you waste anymore of our time
We'll hover close to safety until we collideThis is a glimpse of my absolute best
This is me with nothing left to confess
Clean slate, fresh start, drive me out of control
Little changes here, I wish you'd leave it aloneThis is a glimpse of my absolute best
This is me with nothing left to confess
Clean slate, fresh start, drive me out of control
Little changes here, I wish you'd leave it aloneI can't take anymore
You're holding onto hope, it's the same as before
So, don't you waste anymore of our time
We'll hover close to safety until we collideUntil we collide
(So, don't you waste anymore of our time)
Until we collide
(We'll hover close to safety)
Until we collide
