

# i never learn

## Madcowboys

Where the blue moons shines

Where the tears melt ice

In a sea of guilt

By the fallen stars

Lonely chimes, sing of pain

There's a storm, only love remainsI been stung by a star seed honey

He shone love like a lightning honey

I been hit by a star seed honey

His love burns like a lightning honey

I'm right here I'm your star crossed lover

I lie here like a starless lover

I'll die here as your phantom lover

I never learn

I never learn
