

# We the People

## Megadeth

Secret bureaucracy, it's just a lie  
The devil's henchmen, in suit and tie  
A sacred brotherhood; an ancient rite  
Politicians and the double lives they hide Violate your rights, no more equality  
Surrender freedom, your Social Security  
We, the people face unconstitutional lies  
In greed we trust, in revolution we die Our founding fathers are rolling in their graves  
The land of liberty needs a regime change  
Until you no longer know right from wrong  
The constitution isn't worth the paper it's written on Screams from the future, warn of calamity  
The coming plagues of the new disease  
The illuminati, one world currency  
One world religion, one World everything
