

United

Judas Priest

Look around
They're movin' in
Hold your ground
When they begin We can do it, we can do it
And if they wanna they can try
But they'll never get near
And they can keep out of here
Gonna keep on drivin' never stop United, united, united we stand
United we never shall fall
United, united, united we stand
United we stand one and all
So give me hope, don't give in
Make a stand, we're gonna win We can do it, we can do it
And if they wanna they can try
But they'll never get near
And they can get out of here
Gonna keep on drivin' never stop United, united, united we stand
United we never shall fall
United, united, united we stand
United we stand one and all
So give me love United, united, united we stand
United we never shall fall
United, united, united we stand
United we stand one and all United, united, united we stand
United we never shall fall
United, united, united we stand
United we stand one and all United, united, united we stand
United we never shall fall
United, united, united we stand
United we stand one and all United, united, united we stand
United we never shall fall
