

Into the Night (Nicolas Jaar Remix)

Azari & III

It's been a long long ride
Since I felt this way about someone
You got me feeling so high
It's no wonder, you're the one
Forever we stay strong
Through these modern times
Nothing could ever go wrong
We got the will to survive
So let's get it on (3x)
Am I getting through
Letting loose
Going wild
It's what I want you to do [chorus]
I need you, I want you tonight
I feel you, don't put up a fight
Talking 'bout me, talking 'bout you, talking 'bout us
And what you'd do to me
It's just too much [refrain]
Oooh
I know I got you burning up inside
It's something you can't hide
Oooh
You know you got to get into the night
Live like you were light
Wanna get it (3x)
Wanna get it up allright
Gonna get in (3x)
Gonna get into the night
Can't stop this feeling for you
It's just the way that you are
The things that you do
The way that you move
When our bodies connect
In a sensual groove [chorus] [refrain]
I know I got you
Burning up inside
Can't stop this feeling for you
