

I Would Have Waited Forever

Yes

I would have waited forever - For you to return into my life
I would have waited forever - I would have given you everything I had
I would have waited forever - There's no question, no question at all
So true in the prize, would you wait for me?
All because you got burned, so you took what you needed
Some will always turn away, say it's reason enough
It's another game of exploration
Something calls at reverse and it comes to you
Experience everything as it comes true
So - It will be then
Change - It will happen
See - That we feel it
All - Is completed. Don't you want the world to stop short of giving?
Anytime of night or day, the magic things you love
Everybody hurts when you shout, when you walk away
Talk about it according to you
I would have waited forever - For you to return into my life
I would have waited forever - To give you everything I had
I would have waited forever - There's no question about it at all
So in between the perfect flame of you, this love
will never let you down
Just take it as it comes, for everything will come around
You put your hand up: stop the flow of where you're
going to
It's another game called exploration
How we imagine everything that we think we're going through
It's another reason to make the break
Everyone will move with you now to the riverside
Experience everything, but don't let the land slide
I would have waited forever - For you to return into my life
I would have waited forever - To give you everything I had
I would have waited forever - No question in my body and soul
Forever
