Hey Bob I'm looking at what Jack was talking about
And it's definitely not a particle that's nearby.
It is a bright object and it's obviously rotating because it's flashing,
It's way out in the distance, certainly rotating in a very rhythmic fashion
Because the flashes come around almost on time. As we look back at the earth it's up at about 11 o'clock,
About maybe ten or twelve diameters.
I don't know whether that does you any good,
But there's something out there.
