

Natural Born Killers

Brides of Destruction

There you are, the superstar
Caged and bound don't they look smashing
With all your camera punk ass flashing
There you are it's so bizarre
Broken down the captains shattered
Sunken ship but it don't matter
I've packed the bags under my eyes
And now I'm fine Let me be your one and only cock star
Three five seven with my goddamn on star
Natural born killer, natural born killer Living like a jack with my one eye open
Lost generation and were anti posing
Natural born killer, natural born killer So there it is it's who we are
Black and blue prints for disaster
Guaranteed to kill you faster
Emperors it's time for war
Lost angels of your deconstruction
Bone out cause the cocks in motion
I got strychnine on my tongue and
I'm feeling F I N E fine Let me be your one and only cock star
Three Five Seven with my goddamn on star
Natural born killer, natural born killer Living like a jack with my one eye open
Lost generation and were anti posing
Natural born killer, natural born killer Natural born killer natural born killer
Natural born killer
I'll prey on you when you're weak
Natural born killer Let me be your one and only cock star
Three Five Seven with my goddamn on star
Natural born killer, natural born killer Living like a jack with my one eye open
Lost generation and were anti posing
Natural born killer, natural born killer Natural born killer
Natural born killer
Natural born killer
I'll reap away when you sleep
Natural born killer
Natural born killer
