

Break It Up

We Are Scientists

Is everybody in?
People, don't fail me now
If no one wants to be up all night
What's the point in even going out? No, I can't keep it here
If you don't wanna stay
But it's hard to believe
You could just walk away And I know at some point
That we'll all have to leave
But we'd never go home
If you left it up to me I refuse to take this apart
I refuse to break it up
I refuse to take this apart
I refuse to break it up Call it consequence
Some kind of karmic cloud
Where every wrong will right itself
And once you're gone you'll wanna come right back So let's not all do something
We're gonna regret
And just try to keep living
The time we have left No, I don't really care about
How late we might be
'Cause we'd never go home
If you left it up to me I refuse to take this apart
I refuse to break it up
I refuse to take this apart
I refuse to break it up This is a conversation not worth having
It's only more time we're wasting
No matter what you say
No matter what you say I refuse to take this apart
I refuse to break it up
I refuse to take this apart
I refuse to break it up I refuse to take this apart
I refuse to break it up
I refuse to take this apart
I refuse to break it up
