

Castanets

[Paul Kalkbrenner](#)

She plays castanets
She works without a net
I like her better when she walks away

She said she was mine
She told me twice
I like her better when she walks away

I like her better when she walks away
I like her better when she's here to stay
I like her better when she danced my way
I like her better when she walks away yeah

I love the sun as it silhouettes
I like her better when she walks away
I love her hair as it falls across my face
I like her better when she walks away

I like her better when she walks away
I like her better when she's here to stay
I like her better when she danced my way
You know I like it better when she walks away yeah

She plays castanets
She works without a net
I like her better when she walks away

She turns me on like a pickup truck
I like her better when she walks away
I like the sun shining through her dress
I like her better when she walks away
I like her hair in a tangled mess
I like her better when she walks away

I like her better when she walks away uh huh
I like her better when she's here to stay
I like her better when she danced my way
You know I like it better when she walks away yeah
