

Society's Sequence

Authority Zero

The world breaks loose as we grab for the noose
We're spinning 'round and 'round like we're never going to lose
Falling farther fast and always coming in last
Jumping up and down, well, look what I've found hereI've found society
It's been lying to me
It's got a hold and with a really tight graspLet's turn and face this from a different point of view
It's going on all around us, just tell me the truth
What's right? Tell me what's wrong?
News stands and media can't be wrongI've found society
It's been lying to me
It's got a hold and with a really tight graspWhat's in the papers for one and all
A modern world that is never going to fall
Just quit lying to me and let me be free
Take a step back and what do I see hereI've found society
It's been lying to me
It's got a hold and with a really tight graspI've found society
It's been lying to me
It's got a hold and with a really tight grasp
