Nothingness

Drowning Pool

And this blood on my hands
Now it won't go away
I've been out on this road for daysAnd the fear on the wall
Watch it slowly cascade
As the door holds the wolves at bayThe emptiness is building from
The nothingness that we've all become
The emptiness is building from
The nothingness that we've all becomeAnd this road that I've chose
Seems it's taken its' toll
Leading far far away from the soulAnd the fear on the wall
Watch it slowly cascade
As the door holds the wolves at bayThe emptiness is building from
The nothingness that we've all become
The emptiness is building from
The nothingness that we've all becomeThis thing I've become seems it's taken control
Of my mind and my body my will and my soul
Driving further and further away from my self
Until there's none of me left I've become something elseThe emptiness is building from
The nothingness that we've all become
The emptiness is building from
The nothingness that we've all become
