

Different Colors

Walk the Moon

Coming up slowly, oh, sun over the hill
Daylight still a long time coming
But I know it will
Been under their spell, oh, but we're coming awake
So we'll be rude, we'll be loud
As long as it takes This is why, this is why,
We crank the dial to the right
Ooh this is why we're biting the bullet
We know the kids are right Different colors
We carry each other
We're just different colors
This is why we're biting the bullet
We know the kids are right We keep cracking the music up
Driving through our towns
But they don't wanna hear
They want us to turn it down
So come on lovers, come on haters
Tonight we raise the fire
'Cause when the people get to dancing
They forget about taking sides This is why, this is why
We crank the dial to the right
Ooh this is why we're biting the bullet
We know the kids are right, sing Different colors
We carry each other
We're just different colors
This is why we're biting the bullet
We know the kids are right (For every action, there is an equal and opposite reaction) We're coming awake, out
of your spell,
As long as it takes, we're coming awake We're coming awake, out of your spell,
As long as it takes, we're coming awake This is why, this is why,
We crank the dial to the right
This is why we're biting the bullet
We know the kids are right I said this is why, this is why
We turn it up all night
Oh this is why we're biting the bullet
We know the kids are right Different colors
We carry each other
We're just different colors
This is why we're biting the bullet

We know the kids are right Different colors

We carry each other

We're just different colors

This is why we're biting the bullet

We know the kids are right
