

# Bottom Feeders

## Misery Index

March of the animals  
the indication of a time where the passion of man is lived through fiction  
feed off of the bottom line  
let entertainment be the last refuge for mass opinion  
spouting the antidotes- another preacher of the right paints the world in  
black and white terms.  
Last time in the end zone  
it's hard to care when the world outside has guns against your head  
Castigate then sedate  
convert problems into 'need's then download and erode  
let circuits replace all emotion.

Bottom feeding  
Dragging us across the desert of the real...  
Led up to the trough to be fattened up  
Human pigs so ripe for feasting  
following the rules  
unquestioned-the animal farm falling under siege...  
Rigging the hooks on the virgin nation  
the mediated paradise unfolds  
the outcome a process of brain starvation  
habituate the viewers into clones

Bottom Feeding  
Dragging us across the desert of the real...
