

# Some People

[Nazz](#)

Some people think they were born out of wisdom  
Some people think they were bred out of grace  
Some people think they're alive out of glory  
Some people think through the hole in their faceSome people, some people are  
Some people, some people are  
Some people, some people areSome people, some, some people are so fine  
And some people ain't you and some people ain't me  
And some people are something that I don't ever want to be  
I don't ever want to be, I don't ever want to beSome people think that I'm acting naively  
Some people think I'm not thinking things right  
Some people think we don't look square at each other  
Spite is the main driving force in my lifeSome people, some people are  
Some people, some people are  
Some people, some people areSome people, some, some people are so fine  
And some people ain't you and some people ain't me  
And some people are something that I don't ever want to be  
I don't ever want to be, I don't ever want to beSome people ain't you and some people ain't me  
And some people are something that I don't ever want to be  
I don't ever want to be, I don't ever want to beSome people, some people  
Some people, some people  
Some people
