Night Sky

CHVRCHES

I will carry you and give you life
I will cover you and show you the way
It's a sequence that you never learned
It's a lesson I will never forgetI can hear you in the overtones
Just an echo of the promise we made
Change the future, we can travel time
Or make us blind so we can never look backWe can never look backI'm the night-sky
I'm the fire in your eyes
And I want you
Now and for all time
I'm the cold heart
I'm the secret that you hide
I'll be listening until you decideI communicate in simple strings (take your time)
I'm the only one who gave you the truth (speak to me)
Once you leave me you were really gone (far and near)
Give me something to remember you by (always be)
All that's here is what you left behind (majesty)
Slowly moving in the back of my mind (can't forget)
Take a moment to remember me (and our ways)
Make me blind so I don't ever look backOnly in your name
I will ne'er be freeI'm the night-sky
I'm the fire in your eyes
And I want you
Now and for all time
I'm the cold heart
I'm the secret that you hide
I'll be listening until you decideI'm the night-sky
I'm the fire in your eyes
And I want you
Now and for all time
I'm the cold heart
I'm the secret that you hide
I'll be listening until you decide
