

Upside Down & Inside Out

OK Go

Upside down and inside out and you can feel it.

Upside down and inside out and you can feel it.

Don't know where your eyes are but they're not doing what you said.

Don't know where your mind is, baby, but you're better off without it. Inside down and upside out and you can feel it.

Don't stop, can't stop, it's like an airplane going down

I wish I had said the things you thought that I had said.

Gravity's just a habit that you're pretty sure you can break. So when you met the new you,

Were you scared, were you cold, were you kind?

Yeah when you met the new you, did someone die inside? Don't stop, can't stop, it's like a freight train.

Don't stop, can't stop, it's like an airplane going down.

Don't know where your eyes are but they're not doing what you said.

Don't know where your mind is, baby, but you're better off without it. Looks like it's time to decide,

Are you here, are you now, is this it?

All of those selves that you tried,

Wasn't one of them good enough? Because you're upside down and inside out and you can feel it.

Inside down and upside out and you can feel it, feel it. Don't stop, can't stop, it's like a freight train.

Don't stop, can't stop, until you feel it going down.

I wish I had said the things you thought that I had said.

Gravity's just a habit that you're pretty sure you can break.

Upside down and inside out and you can feel it.

Don't stop, can't stop, until you feel it going down.

Upside down and inside out and you can feel it.

Don't stop, can't stop, until you feel it going down.
