

# Body to Body, Heart to Heart

Cher

Oh oh  
Yea yeah  
Oh oh  
Oh my body  
Oh my bodyBody to body, body to body  
Heart to heart  
Body to body, body to body  
Heart to heartLooking in your eyes tonight  
I can see everything I need  
Holding your heart close to mine  
Feeling you, breathing you, my loveAnd we melt together, two become as one  
Night is burning hotter than the sun  
When I'm with you  
When I'm with youWell I could drown in your eyes  
Die in your arms  
Live for these moments, here in the dark  
I don't know where I end  
Not sure where you start  
When we're body to body  
Body to body, body to body  
Heart to heart  
Body to body, body to body  
Heart to heart  
Body to body, body to body  
Heart to heart  
Body to body, body to body  
Heart to heart  
Body to body, body to body  
Heart to heartBreathing every breath with you  
Next to you is where I need to be  
Part of every part of you  
Feeling you, feeling me, is my loveWe melt together in a tender kiss  
No night has ever been a night like this  
Ohh, when I'm with you  
When I'm with youI could drown in your eyes  
Die in your arms  
Live for these moments here in the dark  
I don't know where I end  
Not sure where you start  
When we're body to body  
Body to body, body to body

Heart to heart  
Body to body, body to body  
Heart to heart  
Body to body, body to body  
Heart to heart  
Body to body, body to body  
Heart to heart My love, and we melt together, two become as one  
Night is burning hotter than the sun  
Ooh, when I'm with you  
When I'm with you I could drown in your eyes  
I could die in your arms  
Live for these moments here in the dark  
I don't know where I end  
I'm not sure where you start  
When we're body to body, baby  
Body to body, baby  
Body to body, body to body  
Body to body, body to body  
Body to body, body to body  
Heart to heart
