The Undiscovered Numbers And Colors

Cky

Colors and numbers
And there's so many never be seen
It's not the big picture
Nothing
The system that we call the
And the areas of avid color
Their origins are undiscovered
Don't go trying
To reveal
Defying
Your intelligence it will always be impossible

No human will ever live to reveal
The undiscovered numbers and colors
No man will live to see colors
Colors and numbers
And there's so many never be seen
It's not the big picture
Nothing
The system that we call the
No man will ever live to see the undiscovered
Numbers and colors
