Angel

Erasure

See how much you mean to me
You?re my electric symphony in blue
Just one look in your eyes
Maybe I was hypnotized by you
You told me on the telephone
Of a picture so serene
And the beat goes on
Feels like a fever burning and I say
Yes, to your love and there?s no secrets
High and ascending, delving deeper
Fly like an angel wings unfurling
Fanning the flames of love eternal
All around the world the love
Will manifest itself in special ways
Up there on the shelf
In spiritual or sexual relays
I want you, yeah, I crave you
I need you next to me
Locking the lip-sync on
A rocket to red hot love perfection
Here we go round and there?s no secrets
High and ascending delving deeper
Under the water clear as crystal
Spinning around and giant circles
Fly like an angel wings unfurling
Fanning the flames of love eternal
You say, reach me I?ll be your deity
Come and touch me make it real
Turning the charm full on
Sending me into excitation
Here we go round no room for secrets
High and ascending delving deeper
Love is resounding clear as crystal
Spinning around in giant circles
Our message is love no room for secrets
Ever evolving heavenly creatures
Fly like an angel wings unfurling
