

Black Velvet (DJ Mind & Jerry Roper Remix)

Ferry Corsten

A Severed lie
A lover's high
No will to fight
So lay your gun down here
Just kiss me sweet
And hold me tight
There's only I
Can get me out of this
Black velvet
Feels warm on my skin
Touch me slowly
Wanna savior my freedom
How could I know I'd love for this?
I lied for love in the name of peace
How could I'd come to this?
How could I know I'd dream for this?
How could I know I'd die for this?
Lay down your gun come run
With me
So kiss me slowly
Kiss me quick
Alone and safe
An empty street
Before the lights
Come blind my skin
I wanna feel
This love I'm in
Guilty pleasure
My desire
I'll hold you to
My line of fire
So kiss me sweet
And kiss me slow
Til I get high
No plans to let this go
What could I say?
What would you do?
Temptation got the better of you too
Black velvet

Feels warm on my skin
Kiss me slowly
Wanna savor this moment with you
How could I know I'd love for this
I lied for love in the name of peace
How could I'd come to this
How could I know I'd dream for this
How could I know I'd die for this
Lay down your gun come run with me
So kiss kiss kiss kiss kiss kiss
Me tonight Your love tastes sweet makes me feel everything's alright
So kiss kiss kiss kiss kiss kiss
Me tonight Your love tastes sweet makes me feel everything's alright
