

Kill the Fun

[Haley Bonar](#)

San Francisco lives beyond
Looking down the road and traveling on
Holding on what we've got
Seek across the window like I'm something you forgot

()

'Stay here' feeling
A feeling can't believe again
Stay and invite me in
You're dreaming from the memories
How are you to moving in? x3

()

Seeks at the Autotune
Born in Wisconsin underneath the same moon
We were somehow out of place
Knew that I could love you but the shadows on your face

()

A midstrike falling
I've got you and you cannot run
We can live forever
And you never have to kill the fun
Only in the morning
You would get back on a plane
Go back to the railroad
Where you never knew my name
