Ghost Shark

Rocket from the Crypt

He wanted to believe in you
Be strong in everything you knew
Draining your blood right behind your back
Let it flow, let it flow, sleeper hold, sleeper hold
Keep still and silent and callThe drowning was an accident
But guilt gives the dead respect
So I am proud to murder you this way
Echo, echo, shadow, shadow
Stay close, breathe in and keep lyingOh evil eye, don't you cry
All false tears far behind you, remind you
Oh evil eye, one more time
Now our sights will find you, remind you
Oh evil eye, don't you cry
Now our taste will remind you
(The ghost shark)Echo, echo, shadow, shadow
Stay close, breathe in and keep lyingOh evil eye, don't you cry
All false tears far behind you, remind you
(And the villagers knew)
Oh evil eye, one more time
Now our sights will find you, remind you
(The forbidden ways of the ghost shark)
(And that they must answer to him before anything else)Oh evil eye, don't you cry
All false tears far behind you, remind you
(The ghost shark, the ghost)
Oh evil eye, one more time
Now our sights will find you, remind you
(The ghost shark)Oh evil eye, don't you cry
All false tears far behind you, remind you
(The ghost)
Oh evil eye, one more time
Now our sights will find you
(The ghost, the ghost)
