

# An Angel On Each Arm

Robin Thicke

Yes, you should be afraid  
Yes, you should be afraid, baby  
They in the bushes, look in the trees  
They got they red laser sniper rifles stuck on me  
Creeping up slow, ducking down real low  
They go to huff and puff and knock down the door  
Come on now  
Well, let's get it started  
Load your gun, light the fuse  
I'm coming for you, baby  
I got to stand and fight  
I'm locked and loaded now  
I'm heavily armed  
I got an angel on each arm  
I got that, an angel on each arm, baby  
Alright now  
You know I got that one on my left, come on  
One on my right, alright  
They protect me every day and every night, I got that  
I saw it so clear, two hearts flying in my mirror  
Then I knew good things were gonna come, now, now, now  
A fortune teller, she read my palm  
She said hard times will soon be over, good times will come  
Well, let's get it started  
Load your gun, light the fuse  
I'm coming for you, baby  
I got to stand and fight  
I'm locked and loaded now  
Heavily armed  
I got an angel on each arm, now, now, now  
An angel on each arm, baby, yeah  
Come on, I got that  
One on my left  
I got one on my right, alright  
They protect me every day and every night, so come on  
Yes, you should be afraid  
I said, yes, you should be afraid  
'Cause I comin for everyone  
No lies, no regrets, no denial, no empty bets

Just the truth as I am  
Alright now  
Well, let's get it started  
Load your gun, light the fuse  
I'm coming for you, baby  
I got to stand and fight  
I'm locked and loaded now  
Heavily armed  
I got an angel on each arm, now, now, now  
An angel on each arm, baby, come on, huh  
You know I got that one on my left  
I got one on my right, alright  
They protect me every day and every night, so come on  
Ooh, come on, I said come on, come on baby  
I got the, the bullet with your name on it, best be afraid of it  
'Cause I'm coming for you baby  
Don't try to stop me, I'm coming to get you, get you, get you, get you  
I got an angel on each arm, yeah, alright, yeah  
An angel on each arm, baby, alright now  
You know I got that one on my left, come on  
One on my right, alright  
They protect me every day and every night, bring it on baby
