How Many Miles

Edguy

Oh yeah
Watching a face and a smile and a light
When yo're walking alone in the street
I know your look always gives you the might
Many miles from your ass to your feet
And I dream what I've seen
Is what I want it to be selfmade reality
How many miles to the gate of reality
How many steps left to go to my dreams
How many miles to the land where my dreams come true
Dreams which come true just have died
Look like a queen but you talk like a pawn and I know you're a fool in disguise
Godfather tell me how to carry on
Blinded by fantasies of lies
And I dream what I've seen
Is what I want it to be self made reality
How many miles to the gate of reality
How many steps left to go to my dreams
How many miles to the land where my dreams come true
Dreams which come true just have died
I see your smile, a golden masquerade
And I know my dream it will be my fate
Time has stolen my fantasy
'Cause it has become a pale realityHow many miles to the gate of reality
How many steps left to go to my dreams
How many miles to the land where my dreams come true
Dreams which come true just have died
