Live With You

White Hinterland

I live with you
That's not something just anyone
Wants to do
Chase you down the street
That's not something I do
For just anyone I meetTell me if I'm too mean
Tell me when I'm being too hard on you
Tell me when I'm too hot to cool down
And I'll cool downThe (???) waste their time
Worrying what color is in style
That's their business, not mine baby
I hear the idle talk
They don't know what we got
Sure it's hard sometimes
But who said it'd be easy?Let them take the easy way
The only road I wanna go on is yours
You say you want me
Don't you know I already am yours?Race from dark to dawn
I've been working way past 3 AM
I don't know how you do it, baby
We argue over the couch
And where to hang the shelves
And whose books should go where, I don't care
But what a thrill just to have someone
To spar against
And I do believe I've met my matchOh honey you can be so mean to me
But I give as good as I get
And at the end of the day
I love you, always will always haveAnd though I wouldn't say it to your face
You're ten times the man
Of any guy I've ever metHoney I can be so mean to you
But you can be so cruel
But at the end of the day I know
You love me, always have and always will
